

## **Cone Bar Range**

Our cone bar range is designed to be a simple and safe solution to control traffic flow, cordon off work areas and restrict access. Easy to affix, they are designed for maximum efficiency. And made of lightweight materials, it couldn't be easier to transport, stack or store our cone bars!

Created to deal with impacts by detaching from the cone, they are a deterrent rather than a preventative solution. This minimises unnecessary damage caused if a collision is to occur.

Striking by day and highly visible by night, we use the most effective vibrant colouring to ensure that our cone bars are as visible as possible.

## **Product Specs:**

- Retractable from 126 – 216 cm
- Lightweight for easy transportation and distribution
- R1 reflective for high visibility

## **Benefits**

- Designed to fit any size traffic cone
- R1 reflective for high visibility day and night on the roads
- Easy to store
- Effect way to manage access to areas for pedestrians

## **Suggested uses**

- Restrict pedestrian access to an area
- Civil engineering work and traffic management
- Events and parking

## **Available in:**

- Red/white (R1)
- Blue/white (R1)
- Black/white (R1)
- Black/yellow (non-reflective)
