

EURO HIGHWAY SAFETY

REVO Range

Our Revo traffic cones are made from flexible PVC plastic to ensure maximum durability and visibility, designed to be at their best in even the toughest environments.

Unlike other cones, which can break apart at high impacts or under heavy weight, our cone range is designed to spring back into its original shape. With a unique interlocking system, our cone body and base are practically inseparable.

Product Specs:

- Height 750 mm
- Weight 4 kg (W2)
- 100% recyclable PVC body and recycled PVC base
- Interlocking system, body and base inseparable
- 3M 3340 (class 2) 40 cm reflective sheeting
- Fully compliant with standard BS EN 13422 + A1 (2009)

Benefits

- Durable – made from flexible PVC plastic, highly resilient and forceful impact resistant
- Fluorescent colouring for high visibility day and night on the roads
- Complies with UK standards
- Easily stackable

Suggested uses

- Civil engineering work and traffic management
- Events and parking

Available in:

- Fluorescent orange
- Electric blue
- Safety yellow
- Event black
- Lime green
